

Simplified Summary of How the Extracts Work by Prevention and Solving of Health Problems

primary	- main extract effect
secondary	- supporting extract effect
tertiary	- additional extract effect

	Garlic	Milk Thistle	Seabuckthorn	Maral Root	Parsley	Elder	Blueberry	Onion	Horseradish	Beet Root
Adaptogens			primary	primary						
Anemia										primary
Angina						primary				
Antibacterial effects	primary							secondary		
Antibiotics, vegetable									primary	
Arteriosclerosis	primary	secondary				tertiary				
C-reactive proteins							primary			
Diabetes – hypoglycemia							primary			
Diabetes – neuropathy							primary			
Inner skin cleaning					secondary					
Breathing						primary			secondary	
Geriatric effects	primary			primary				secondary		
Cholesterol		primary		tertiary						tertiary
Immunity	secondary		primary							primary
Liver		primary		tertiary		tertiary				secondary
Cardiovascular system	primary									primary
Blood, thick		secondary								primary
Spasm of smooth muscles					primary					
Kidneys					primary					
Leukemia										primary
Menstruation problems					primary					
Metabolism	secondary							secondary	primary	secondary
Urinary bladder					primary					
Flatulency					primary					
Cold						primary				
Neuralgia						primary				
Heart-burn			primary							
Potency				primary		tertiary				
Cold prevention										secondary
Prostate inflammation					primary					
Antitumoral prevention			secondary					secondary		primary
Organism over-acidity					primary					
Organism regeneration			primary	primary						
Convalescence			primary	primary					primary	
Rheumatism						primary				
Mucosa							primary			
Stress			tertiary	primary						
Intestinal flora								primary	secondary	
Intestinal colic					primary					
Injurants – wash									primary	
Hypotension		tertiary								
Hypertension	primary				secondary	tertiary				
Digestion					secondary			primary	secondary	
Fats	primary									
Calcic sediments	primary									
Vitality	primary		secondary	primary						
Vitamins		tertiary	primary			secondary	secondary	secondary		secondary
Hydrops					primary	primary				
Free radicals						secondary	secondary			primary
Ulcers, prevention			primary							
Phlegming						primary				
Coprostasia										primary
Sight							primary			
Stomach			secondary		secondary	secondary		primary	secondary
